

OPUS POCUS DC1210

LIMITED EDITION
STUDIO MONITOR

OVERVIEW:

A 3 way full range speaker, with a 10" dual concentric (co-axial) mid-top, using a custom PHL mid driver, and a custom 18sound 1.4" compression driver bi-amped, with a passive crossover between mid & top, and a separately powered 1000w 12" sub driver.

HISTORY:

Several years ago I built a custom system for Warp Technique in Berlin, using the 1st of these dual concentric cones. The job description was for a small party system, but I knew he had a lovely studio, so I tried to build something that would work well in there too.
